

Complete Academic Information

Gyan Ganga Institute of Technology and Sciences (GGITS), Jabalpur

Research-based academic profile • Prepared September 2026 • Based primarily on official GGITS webpages and institutional disclosures

Important note: Academic programmes, regulations, calendars, scholarship criteria, fees and accreditation status can change. This report summarizes information available from official GGITS sources during the research period and should be verified with the institute for any admission or official decision.

1. Institute at a Glance

Institute	Gyan Ganga Institute of Technology and Sciences (GGITS)
Location	Tilwara Ghat Road, Near Bargi Hills, Jabalpur, Madhya Pradesh – 482003
Established	2003
Institutional status	Official website describes GGITS as an Autonomous Institution
Approval	Approved by AICTE
University affiliation	Affiliated to Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal
Academic areas	Engineering, Pharmacy, Management and Applied Sciences

2. Academic Structure and Programmes

GGITS offers undergraduate and postgraduate education. The official programme pages list engineering programmes together with pharmacy, management and MCA offerings. The exact programme list shown on different official pages can vary as the website is updated, so the following is a consolidated academic view.

Undergraduate B.Tech programmes

- Computer Science & Engineering (CSE)
- Computer Science and Business Systems (CSBS)
- Computer Science and Design
- CSE – Artificial Intelligence & Machine Learning
- CSE – Data Science
- CSE – IoT and Cybersecurity including Blockchain Technology
- Artificial Intelligence and Robotics
- Electronics & Communication Engineering
- Electrical Engineering
- Electrical & Electronics Engineering
- Mechanical Engineering

- Civil Engineering

Other undergraduate/diploma programmes

- B.Pharmacy (B.Pharm)
- D.Pharmacy (D.Pharm)

Postgraduate programmes

- M.Tech – Computer Science & Engineering
- M.Tech – IoT & Sensor Systems
- M.Tech – Energy Technology
- M.Tech – Machine Design
- M.Tech – Structural Engineering
- MBA
- MBA – Business Analytics
- MBA – FinTech
- Master of Computer Applications (MCA)

3. Academic Departments and Academic Leadership

The official academic structure organizes programmes into engineering and allied departments, pharmacy, management and postgraduate areas. The institute's published academic leadership information identifies roles such as Dean – Computer Science & Engineering, Dean – IQAC and Head Coordinator, Dean Examination, Registrar/Administration & Academics, and programme leadership for MBA and other departments.

For a student, the practical academic chain generally involves the department/HOD, faculty mentors and coordinators, Dean/academic administration and the examination system.

4. Curriculum, Regulations and Examination Framework

GGITS maintains a dedicated Regulations and Curriculum section and provides access to an Exam Ordinance & Regulations/ordinance page through its official website. Because GGITS is described by its official website as autonomous while also affiliated to RGPV, students should use the current programme-specific curriculum and the current examination regulations applicable to their batch.

What students should check each semester: current curriculum/syllabus, credit structure, academic calendar, examination notices, internal assessment requirements, attendance notices, practical/project requirements and any updated academic ordinances.

5. Academic Calendar

GGITS publishes academic calendars by semester. The official academic calendar page currently provides semester-specific calendar documents, including odd-semester calendars for 3rd, 5th and 7th semesters for Academic Year 2025–26 on the page captured during research.

The calendar is the main reference for semester commencement, teaching schedule, attendance displays, assessments, examinations and other academic milestones. Students should always download the calendar for their own semester rather than relying on an older batch's dates.

6. Teaching and Learning Ecosystem

The institute presents its academic approach as outcome-oriented and supported by classrooms, laboratories, industry integration, professional skill development, research and co-curricular activities. Its official institutional overview also lists academic/industry learning collaborations or platforms involving Google, Cisco, Oracle, Microsoft, AWS, Red Hat, LinkedIn Learning, NPTEL, IIT Bombay Spoken Tutorials and IBM.

This suggests that the academic experience is intended to combine university/department coursework with certification opportunities, practical learning and exposure to industry technologies. Availability and participation requirements can differ by department and year.

7. Research, Innovation and Academic Development

The official 2026 admission/institutional information highlights research and innovation activity, reporting more than 500 research papers published, more than 100 patents filed, more than 25 funded projects, more than 15 industry MoUs and more than 30 conferences organized. These figures are institutional claims and should be interpreted as aggregate highlights rather than guarantees for every student.

Academic innovation infrastructure referenced by GGITS includes research activity, patents, publications, conferences, skill development and the Genesis Incubation Center. Students interested in research should ask their department about faculty projects, publication opportunities, project funding and incubation support.

8. Central Library and Learning Resources

GGITS's Central Library is a major academic resource centre supporting engineering, pharmacy, management, science and technology disciplines. According to the official library page, it includes:

Resource/Facility	Officially published information
Textbooks	70,000+ textbooks
Reference books	8,150+ reference books
eBooks	5,000+
Journals	1,000 national and international journals
Theses/project reports	1,500+
Seating	Capacity stated for 240 students at a time
Typical timings	Working days: 8:00 AM–9:00 PM; Sundays/holidays: 9:30 AM–5:00 PM

The library page also lists e-resources and services such as Springer resources, ScienceDirect, DELNET, National Digital Library, Shodhganga, Web OPAC, digital library services, remote access and institutional repositories. The library uses an automated system and describes RFID/self-circulation and remote-access capabilities.

9. Accreditation and Quality Assurance

The institute's official pages state that five undergraduate programmes are NBA-accredited: Computer Science & Engineering, Electronics & Communication Engineering, Electrical Engineering, Mechanical Engineering and Electrical & Electronics Engineering. The detailed NBA page should be consulted for programme-specific accreditation periods because validity dates are programme-specific.

GGITS also maintains quality and compliance links including IQAC, AICTE mandatory disclosure, NBA public disclosure and NIRF-related information.

10. Scholarships and Financial Academic Support

GGITS publishes both government scholarship information and institute/management scholarship information. Government schemes listed include OBC, SC, ST, Minority, Central Sector, Gaon Ki Beti, Mukhyamantri Medhavi

Vidyarthi Yojana, Pratibha Kiran, AICTE Pragati, PMSSS and other state/sector schemes.

The official scholarship pages specify that eligibility can depend on category, family income, domicile, board performance, merit, programme and government rules. Amounts and income limits are subject to policy changes, so students should verify the current year's rules before applying.

GGITS also publishes an Economical Weaker Meritorious Scholarship record. Its page reports scholarship disbursement totals for several academic periods, including ■26,41,200 for 302 students for 01.08.2025–17.01.2026, as displayed on the official page.

11. Academic Facilities Supporting Student Learning

- Departmental laboratories and technology-oriented learning spaces
- Central Library and digital/e-resource access
- Auditorium and spaces for seminars, conferences and academic events
- Sports and extracurricular infrastructure
- Campus-based academic support and administration
- Skill development, certification and industry-linked learning opportunities

12. Admissions – Academic Perspective

For B.Tech admissions, the official 2026–27 admission information states that candidates must have passed 10+2 with Physics, Chemistry and Mathematics with at least 45% marks, with admission based on JEE Main score or through MP DTE counselling. Admission rules may differ by category, programme, lateral entry and year, so the current admission notification should always be checked.

For postgraduate, pharmacy and other programmes, eligibility and admission procedures should be confirmed from the current official GGITS admission material and applicable regulatory/university requirements.

13. Campus Academic Contact Information

Address	Tilwara Ghat Road, Near Bargi Hills, Jabalpur, Madhya Pradesh – 482003
Toll-Free	18008898050
General Email	contact@ggits.org
Registrar	8770834794 (as published on the official contact page)
Admissions	Official page publishes dedicated admission WhatsApp/mobile contacts

14. What This Means for a Current GGITS Student

For day-to-day academic success, the most important official resources are the department, current academic calendar, current syllabus/curriculum, examination notices, LMS/e-learning resources, library and scholarship office. A student should not rely only on old PDFs or senior batches because autonomous academic rules and semester schedules can be updated.

Recommended student checklist:

- Keep the latest semester academic calendar.
- Download the curriculum/syllabus applicable to your batch.
- Track internal assessments, practicals, projects and examination notices.
- Use library databases and remote-access resources for assignments and research.

- Participate in skill-development and industry certification programmes relevant to your branch.
- Check scholarship deadlines and documentation requirements early.
- Verify any attendance, examination or promotion rule directly from the latest official regulation.

15. Overall Academic Assessment

Based on the official institutional information reviewed, GGITS has a broad multidisciplinary academic structure with a particularly large engineering portfolio, including conventional core branches and newer computing specializations such as AI & ML, Data Science, IoT/Cybersecurity/Blockchain and AI & Robotics. The academic ecosystem is supported by AICTE approval, RGPV affiliation, autonomous institutional status as stated by GGITS, programme-level NBA accreditation for five listed engineering programmes, a large central library, research/innovation initiatives and industry-linked learning platforms.

The strongest way to judge the academic experience for a particular student, however, is programme-specific: curriculum quality, faculty, laboratory access, peer group, project opportunities, attendance/exam rules and placement preparation can vary by department and batch.

Research Sources and Verification Links

This PDF was prepared from official GGITS webpages accessed during September 2026. Key sources:

Methodology and limitation

The report prioritizes official GGITS sources. Where official pages presented different programme lists or evolving website content, the report consolidated the current information and flagged that students should verify programme-specific and batch-specific details. This document is an academic information report, not an official prospectus, degree regulation or admission offer.
